**SONNEMAN**  
A WAY OF LIGHT

## constellation<sup>®</sup> cosmic cube<sup>™</sup>

Connected in linear strands, a dramatically suspended array of LED hubs forms the geometry of a bold cube of dazzling luminance. Scaled in two sizes, Cosmic Cube can be ordered in 20" and 30" configurations or customized for your project.

## purolinear 360<sup>™</sup>

Purolinear 360 can transition between wall and ceiling mounting using corner connectors, as shown, providing an unbroken path of directable linear illumination throughout a space. Light can be directed in 360 degrees of rotation around its axis.

## coral surface<sup>™</sup>

Flowing sculptural shapes connect clusters of luminaires across wall or ceiling surfaces in this organically modern system of light.

## suspenders<sup>®</sup>

A delicately scaled, modular system of interconnected elements and suspended LED luminaires. Suspenders can be configured and customized as individual lighting sculptures or as a tiered web of infinite scope and variety.

## intervals<sup>®</sup>

Intervals is a uniquely integrated linear architectural lighting system of rhythmically aligned bidirectional illumination, with a range of available decorative and functional trims.

## constellation<sup>®</sup> hedron<sup>™</sup>

Hedron is a spectacular celestial composition of radiant LED hubs connected by the triangular structural tension of minimal coaxial rods. The dazzling luminance and expansive scale forms a sculptural connection to the physical properties that define the galaxies of space, occupying a large volume with a low density of mass.
