Cosulich Interiors in collaboration with Matlight: bespoke sculpture lamp, part of the Italian modern collection called Andromeda, designed by Ekaterina Elizarova for Matlight Milano. The bold daring design exposes the natural beauty of the contrasting materials used: a black Marquina base that supports a refined glass cylinder, containing a satin brass diffuser embracing the light source. The organic simple round shapes turn this product into a cosmic object d'Art.

Nominated Best Designer of 2015 by Elle Decoration, Ekaterina Elizarova graduated both in Russia and the UK, she asserts her own unique and recognizable style by combining the strengths of Russian and British Design. Prize-winner of many prestigious global design awards, she designs collections all-over the world, delivering lectures and consultations on design trends.
